KUBERNETES AND OPEN SOURCE IN THE CLOUD

Gerald Schmidt

THE COMPETITION

ALL HAPPY FAMILIES

The 'orchestration wars' saw a large variety of proprietary and open source offerings.

SPLENDID ISOLATION

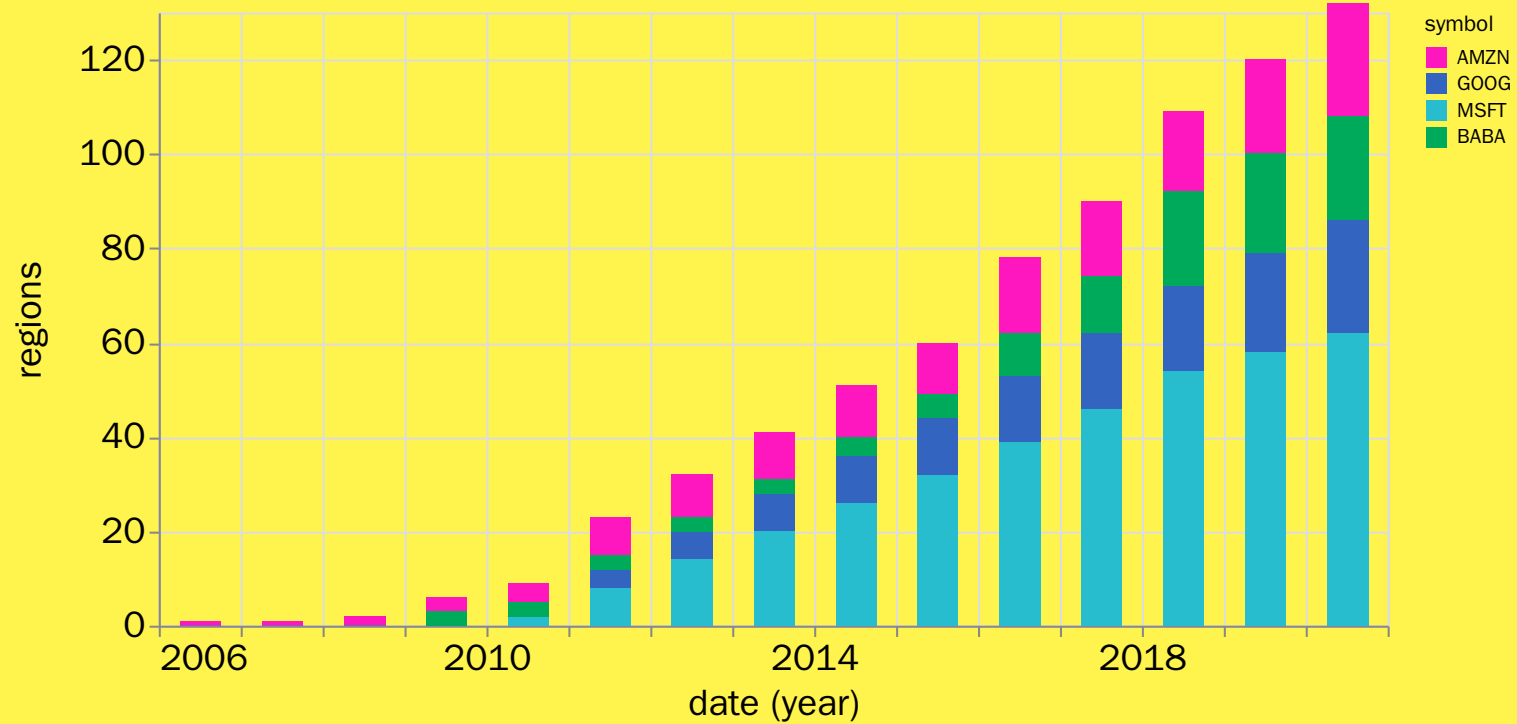

Kubernetes

When the dust settled, only one of them was left standing.

MEANWHILE IN THE PUBLIC CLOUD

FIRST MOVER ADVANTAGE

Regions vary significantly in size. Some values have been interpolated.

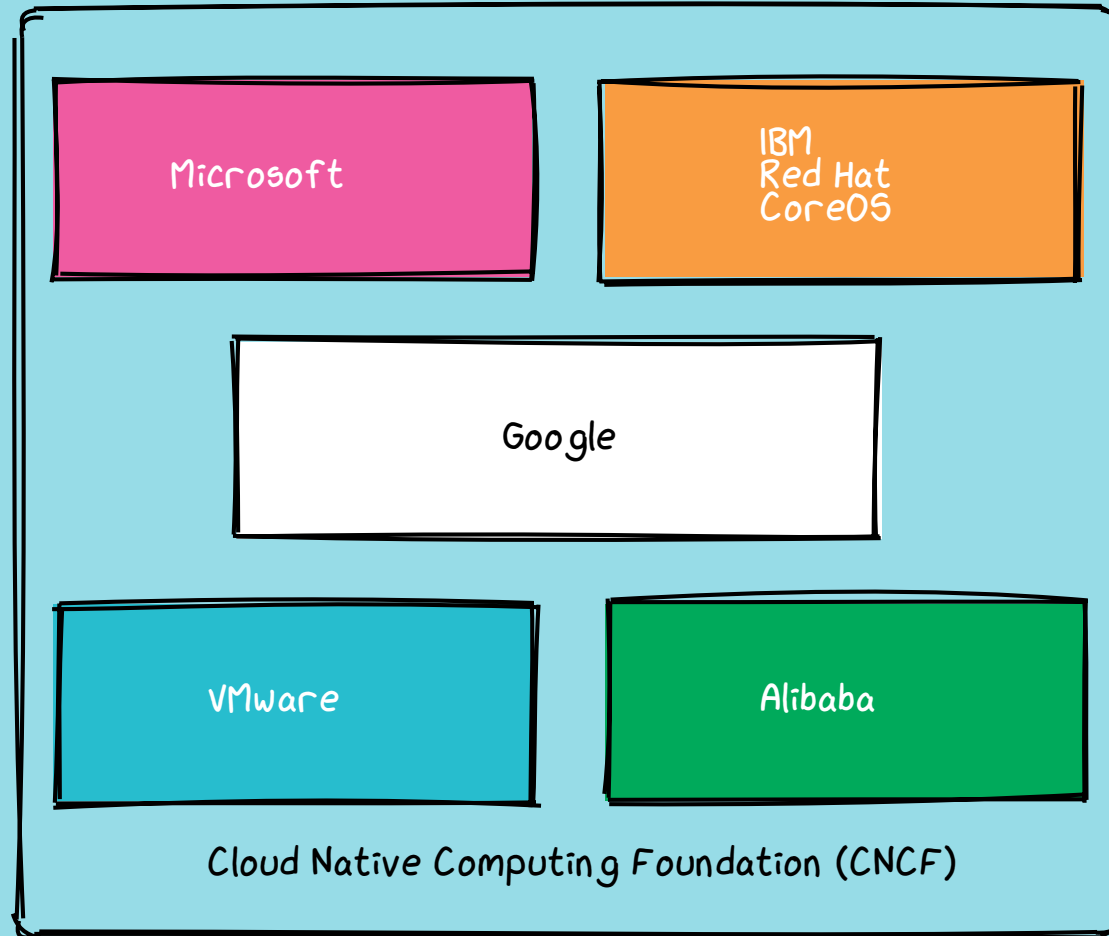

FOLLOW FAST, BUT HOW FAST IS FAST ENOUGH?

THE HORCRUX PATTERN

VENDOR SHARDING

PRECONDITIONS

open source

neutral IP ownership

extensibility

PRECONDITIONS

A suitably permissive license is a necessary but not sufficient precondition.

PRECONDITIONS

open source – MIT

neutral IP ownership – CNCF

extensibility

K8s would **not** be what it is today without neutral IP ownership... K8s has spawned an entire ecosystem **because** it can be used by consuming projects/products without fear.

PRECONDITIONS

open source – MIT

neutral IP ownership – CNCF

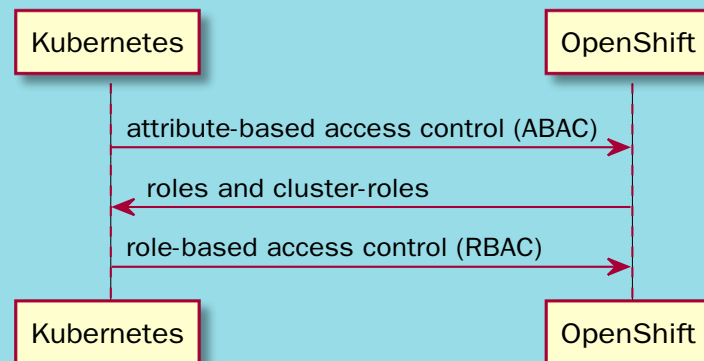

extensibility – controllers and operators

Controllers add custom processing to the core reconciliation loop.

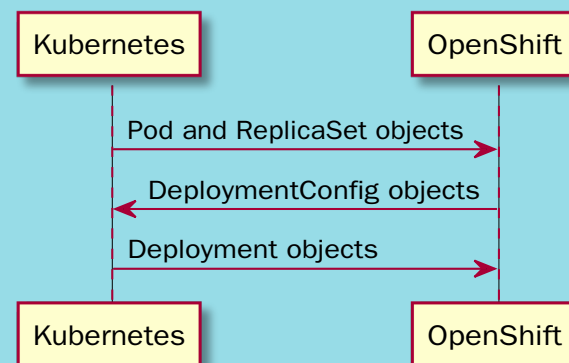

When paired with custom resource definitions, they are known as **operators**.

SOUL-SEARCHING AT THE BAZAAR

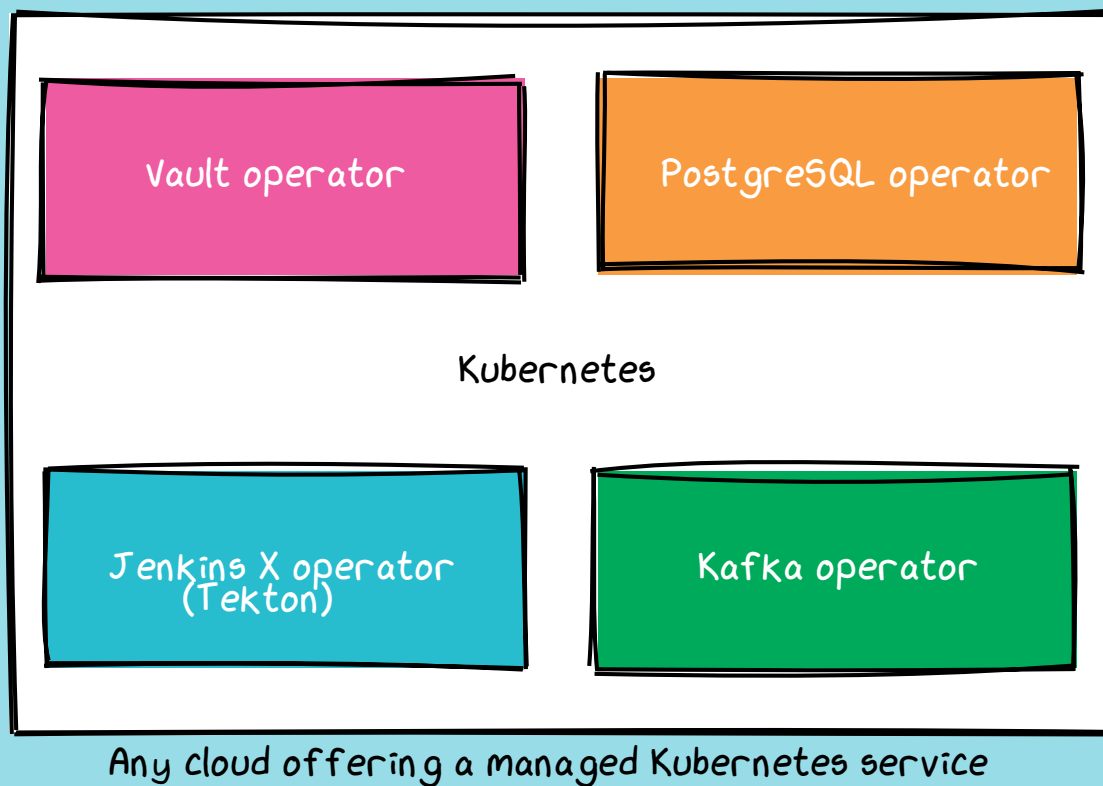

A VERY PUBLIC BREAKUP

AWS perfected the use of services based on open source products.

In 2016 MongoDB responded with the Server Side Public License.

A PORTABLE STACK

REMEMBER THESE?

Imagine replacing them with supported open source products.

On AWS or any other cloud.

QUIZ FOR ASPIRING CLOUD VENDORS

IS THE OPERATOR LIFE FOR ME?

Did AWS steal a multi-year march on you?

Are you at risk of US trade sanctions?

Are you a bazaar kind of company?

YES!	NOPE
